WINDOWS & DOORS

E3000 WINDOWS

You shouldn’t have to look beyond our Province or even our national borders for high quality, custom built windows.

Our E-Series windows offer you premium, locally made, metal clad and vinyl windows, built right here in our Kelowna facility, with distributors across Western Canada!

We live in Western Canada, so we know the struggles of extreme cold winters and well as scorching hot summers! That’s why we build our windows with energy efficiency in mind and design them to withstand a wide range of climates. With dual and triple glazed compatibility, as well as multiple loe options available, we have no problem meeting and even exceeding step codes and NAFS qualifications.

Our E-series window is split into two lines – E3 & E3H. The E3 series, is made exclusively from PVC. The E3H series, is an aluminum clad PVC hybrid window. The Aluminum Hybrid series uses an extruded aluminum exterior in a traditional stile and rail look to resemble proper sash assembly, unlike most windows that use a 45° corner assembly. All the opening sashes are steel reinforced for increased strength and durability.

Glass Option Ratings

Glass Type	U-Value	SHGC	Visible Transmittance
Dual Loe	1.5	0.3	0.57
Dual Loe/i89	1.23	0.3	0.56
Triple Loe	1.21	0.28	0.52
Triple Loe x 2	0.97	0.26	0.44

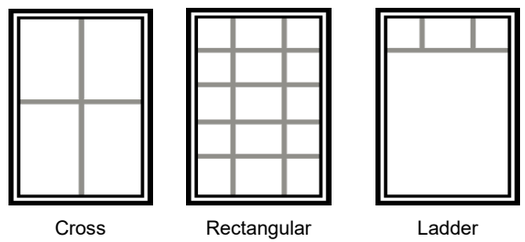
Pinhead

Hardware

Standard Black and White Nesting Handles, with multipoint sash locking for security and proper closing

Grille Patterns

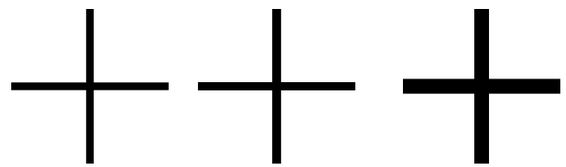


Cross | Rectangular | Ladder

Double Ladder | Perimeter | Double Perimeter

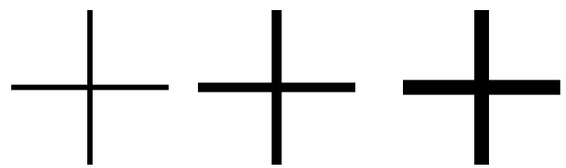
Available SDLs

Vinyl



0.90” | 1.25” | 2”

Aluminum



0.75” | 1.5” | 2”

Shadow Bar Options also available

We make sure to match the internal sash colour on windows that are colour coated in and out. Most competitors leave a white internal core, giving their windows a zebra look.

Our Perimeter Aluminum Design gives a clean, one window appearance
